## Article 4 (5) – List of issuing bodies

<b>Member State Hungary</b>	<b>List of bodies as referred to in Article 2(c) of Directive 90/427/EEC officially approved or recognised for maintaining or establishing studbooks *</b>					<b>Version 2011.03.16.</b>
<b>Six digit UELN-compatible identification code of the database</b>	<b>Name</b>	<b>Approval date</b>	<b>Contact details</b>	<b>Name of the breed</b>	<b>Studbook of the origin of the breed</b>	<b>Remarks</b>
3481__*	Central Agricultural Office, Horse Passport Office (Mezőgazdasági Szakigazgatási Hivatal Központ, Lóútlevel Iroda)	—	✉ 1144 Budapest Remény utca 42/b. Hungary ☎ 00 36 1 316 0663 📠 00 36 1 316 0664 @: loutleveliroda@ommi.hu <a href="http://www.mgszh.gov.hu">www.mgszh.gov.hu</a>	all equine breeds approved in Hungary and all equidae not belonging to any breed	central database for all approved breeds and equidae not belonging to any breed	—

\* The Hungarian breeding organisations approved for maintaining their studbooks send their equine data to the single central database for issuing horse passports. All equidae in Hungary are registered in this single central database and horse passports are issued from this database by the Central Agricultural Office belonging to the Ministry of Rural Development. All identification numbers starting with 3481 refer to the single Hungarian central equine database, the digit 5 and 6 of UELN code differ the breeds registered in the central database (e.g. 3481AT refers to Thoroughbreds).

## Article 5 (6)

Hungary is not availing of this derogation.

## Article 7 (2)

Hungary is not availing of this derogation.

### **Article 12 (4)**

Hungary is authorising alternative methods of identification for approved horse breeds except Thoroughbred, Quarter Horse, and Hungarian Sport Horse being mikrochipped from the year 2010, Bardigiano and Appaloosa from the year 2011. The authorised alternative methods (visible marks) ensure that the identity of the equine animal can be verified and effectively prevent the double issuing of identification documents. The national registration system ensuring that the majority of equidae are identified by implantation of electronic transponders is being established.

### **Article 14 (2)**

Hungary is not availing of this derogation.

### **Article 23 (3)**
