## II. Health information

## II.1. Public Health Attestation

I, the undersigned official veterinarian, hereby certify, that the animals described in this certificate:

II.1.1. come from holdings which have been free from any official prohibition on health grounds, for the last 42 days in the case of brucellosis, for the last 30 days in the case of anthrax, for the last six months in the case of rabies, and, have not been in contact with animals from holdings which did not satisfy these conditions;

II.1.2. have not received:

- any stilbene or thyrostatic substances,
- oestrogenic, androgenic, gestagenic or b- agonist substances for purposes other than therapeutic or zootechnical treatment (as defined in Directive 96/22/EC).

II.1.3. with regard to bovine spongiform encephalopathy (BSE):

(a) the animals are identified by a permanent identification system enabling them to be traced back to the dam and herd of origin, and they have not been exposed to the following animals:

- (i) any BSE cases,
- (ii) bovine animals which, during their first year of life, were reared with the BSE cases during their first year of life, and which investigation has shown consumed the same potentially contaminated feed during that period, or
- (iii) if the results of the investigation referred to in indent (ii) are inconclusive, bovine animals born in the same herd as, and within 12 months of the birth of, the BSE cases;

(1)(2)either (b) if there have been BSE indigenous cases in the country concerned, the animals were born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants, as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health, was effectively enforced or after the date of birth of the last BSE indigenous case if born after the date of the feed ban.]

(1)(3)or (b) the animals were born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health, was effectively enforced or after the date of birth of the last BSE indigenous case if born after the date of the feed ban.]

(1)(4)or (b) the animals were born at least two years after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants, as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health, was effectively enforced or after the date of birth of the last BSE indigenous case if born after the date of the feed ban.]

## II.2. Animal Health Attestation

I, the undersigned official veterinarian, hereby certify, that the animals described above meet the following requirements:

II.2.1. they come from the territory with code: \_\_\_\_\_ (5) which, at the date of issuing this certificate:

(1)either (a) has been free for 24 months from foot-and-mouth disease ]

(1)or (a) has been considered free from foot-and-mouth disease since \_\_\_\_\_ (dd/mm/yyyy), without having had cases/outbreaks after that date, and authorised to export these animals by Commission Implementing Regulation (EU) No \_\_\_\_\_/\_\_\_\_\_, of \_\_\_\_\_ (dd/mm/yyyy),]

(b) has been free for 12 months from rinderpest, Rift valley fever, contagious bovine pleuropneumonia, lumpy skin disease and epizootic haemorrhagic disease, and for 6 months from vesicular stomatitis,

(c) where during the last 12 months, no vaccination against the diseases mentioned in points (a) and (b) has been carried out and imports of domestic cloven-hoofed animals vaccinated against these diseases are not permitted;

(1)either (d) has been free for 24 months from bluetongue;]

Part II: Certification	II. Health information				
	(1)or	○ [(d)	has not been free for 24 months from bluetongue, and the animals have been vaccinated with an inactivated vaccine, at least 60 days before the date of dispatch to Great Britain, against all bluetongue serotype/s _____ (insert serotype/s) which are those present in the source population as demonstrated through a surveillance programme(9) in an area with a 150 km radius around the holding(s) of origin described under box reference I.11., and the animals are still within the immunity period of time guaranteed in the specifications of the vaccine;]		
	(1) ○ either	II.2.2.	they have remained in the territory described under point II.2.1. since birth, or for at least the last three months before dispatch to Great Britain and without contact with imported cloven-hoofed animals for the last 30 days;]		
		○ Or (1)	II.2.2 have been introduced on _____ (dd/mm/yyyy) into the territory described under point II.2.1, from the EU territory with code _____ (5) that at that date was authorised to import the animals into Great Britain and the animals has not been in contact with imported cloven-hoofed animals from countries not subject to transitional import arrangements for the last 30 days.]		
	II.2.3.	they have remained since birth or at least 40 days before dispatch in the holding(s) described under box reference I.11.:			
	(a)	in and around which, in an area with a 150 km radius, there has been no case/outbreak of epizootic haemorrhagic disease during the previous 60 days, and			
	(b)	in and around which, in an area with a 10 km radius, there has been no case/outbreak of foot-and-mouth disease, rinderpest, Rift valley fever, bluetongue, contagious bovine pleuropneumonia, lumpy skin disease and, vesicular stomatitis during the previous 40 days;			
	II.2.4.	they are not animals to be killed under a national programme for the eradication of diseases, nor have they been vaccinated against the diseases referred to in point II.2.1.(a) and (b);			
	II.2.5.	they come from herds:			
		(a)	included in an official system for the control of enzootic bovine leukosis, and		
	(b)	that are not restricted under the national legislation regarding eradication of tuberculosis and brucellosis, and			
	(c)	recognised as officially tuberculosis free;(6)(6a)			
II.2.6.	they have not been vaccinated against brucellosis and they:				
(1)either	○	[come from herds which are recognised as officially brucellosis free;](6)			
(1)or	○	[are castrated males of any age;]			
II.2.7.	they are individually marked on at least two places on their hindquarters as to show that they are exclusively intended for immediate slaughter;(7)				
II.2.8.	they are/were(1) dispatched from their holding(s) of origin, without passing through any market:				
(1)either	○	[directly to Great Britain,]			
(1)or	○	[to the officially authorised assembly centre described under box reference I.13 situated within the territory described under point II.2.1]			
and, until dispatched to Great Britain:					
	(a)	they did not come in contact with other cloven-hoofed animals not complying with the health requirements as described in this certificate, and			
	(b)	they were not at any place where, or around which within a 10 km radius, during the previous 30 days there has been a case/outbreak of any of the diseases referred to in point II.2.1;			
II.2.9.	any transport vehicles or containers in which they were loaded were cleaned and disinfected before loading with an officially authorised disinfectant;				
II.2.10.	they were examined by an official veterinarian within 24 hours of loading and showed no clinical sign of disease;				
II.2.11.	they have been loaded for dispatch to Great Britain on _____ (dd/mm/yyyy) (8) in the means of transport described under box reference I.15 above that were cleaned and disinfected before loading with an officially authorised disinfectant and so constructed that faeces, urine, litter or fodder could not flow or fall out of the vehicle or container during transportation.				

Part II: Certification

II. Health information

II.3. Animal transport attestation

I, the undersigned official veterinarian, hereby certify, that the animals described above are fit for the intended transport and have been treated before and at the time of loading in accordance with the relevant provisions of Regulation (EC) No 1/2005.

Part II: Certification

II. Egészségügyi információk

II.1. Public Health Attestation

I, the undersigned official veterinarian, hereby certify, that the animals described in this certificate:

II.1.1. come from holdings which have been free from any official prohibition on health grounds, for the last 42 days in the case of brucellosis, for the last 30 days in the case of anthrax, for the last six months in the case of rabies, and, have not been in contact with animals from holdings which did not satisfy these conditions;

II.1.2. have not received:

- any stilbene or thyrostatic substances,
- oestrogenic, androgenic, gestagenic or b- agonist substances for purposes other than therapeutic or zootechnical treatment (as defined in Directive 96/22/EC).

II.1.3. with regard to bovine spongiform encephalopathy (BSE):

(a) the animals are identified by a permanent identification system enabling them to be traced back to the dam and herd of origin, and they have not been exposed to the following animals:

- (i) any BSE cases,
- (ii) bovine animals which, during their first year of life, were reared with the BSE cases during their first year of life, and which investigation has shown consumed the same potentially contaminated feed during that period, or
- (iii) if the results of the investigation referred to in indent (ii) are inconclusive, bovine animals born in the same herd as, and within 12 months of the birth of, the BSE cases;

(1)(2)either (b) if there have been BSE indigenous cases in the country concerned, the animals were born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants, as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health, was effectively enforced or after the date of birth of the last BSE indigenous case if born after the date of the feed ban.]

(1)(3)or (b) the animals were born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health, was effectively enforced or after the date of birth of the last BSE indigenous case if born after the date of the feed ban.]

(1)(4)or (b) the animals were born at least two years after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants, as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health, was effectively enforced or after the date of birth of the last BSE indigenous case if born after the date of the feed ban.]

II.2. Animal Health Attestation

I, the undersigned official veterinarian, hereby certify, that the animals described above meet the following requirements:

II.2.1. they come from the territory with code: \_\_\_\_\_ (5) which, at the date of issuing this certificate:

(1)either (a) has been free for 24 months from foot-and-mouth disease ]

(1)or (a) has been considered free from foot-and-mouth disease since \_\_\_\_\_ (dd/mm/yyyy), without having had cases/outbreaks after that date, and authorised to export these animals by Commission Implementing Regulation (EU) No \_\_\_\_\_/\_\_\_\_\_, of \_\_\_\_\_ (dd/mm/yyyy),]

(b) has been free for 12 months from rinderpest, Rift valley fever, contagious bovine pleuropneumonia, lumpy skin disease and epizootic haemorrhagic disease, and for 6 months from vesicular stomatitis,

(c) where during the last 12 months, no vaccination against the diseases mentioned in points (a) and (b) has been carried out and imports of domestic cloven-hoofed animals vaccinated against these diseases are not permitted;

(1)either (d) has been free for 24 months from bluetongue;]

Part II: Certification	II. Egészségügyi információk		
	(1)or      ○ [(d)      has not been free for 24 months from bluetongue, and the animals have been vaccinated with an inactivated vaccine, at least 60 days before the date of dispatch to Great Britain, against all bluetongue serotype/s _____ (insert serotype/s) which are those present in the source population as demonstrated through a surveillance programme(9) in an area with a 150 km radius around the holding(s) of origin described under box reference I.11., and the animals are still within the immunity period of time guaranteed in the specifications of the vaccine;]		
	(1) ○      they have remained in the territory described under point II.2.1. since birth, or for at least the last three either      months before dispatch to Great Britain and without contact with imported cloven-hoofed animals for [II.2.2.      the last 30 days;]		
	○ Or (1) [II.2.2 have been introduced on _____ (dd/mm/yyyy) into the territory described under point II.2.1, from the EU territory with code _____ (5) that at that date was authorised to import the animals into Great Britain and the animals has not been in contact with imported cloven-hoofed animals from countries not subject to transitional import arrangements for the last 30 days.]		
	II.2.3.      they have remained since birth or at least 40 days before dispatch in the holding(s) described under box reference I.11.:		
	(a)      in and around which, in an area with a 150 km radius, there has been no case/outbreak of epizootic haemorrhagic disease during the previous 60 days, and		
	(b)      in and around which, in an area with a 10 km radius, there has been no case/outbreak of foot-and-mouth disease, rinderpest, Rift valley fever, bluetongue, contagious bovine pleuropneumonia, lumpy skin disease and, vesicular stomatitis during the previous 40 days;		
	II.2.4.      they are not animals to be killed under a national programme for the eradication of diseases, nor have they been vaccinated against the diseases referred to in point II.2.1.(a) and (b);		
	II.2.5.      they come from herds: (a)      included in an official system for the control of enzootic bovine leukosis, and (b)      that are not restricted under the national legislation regarding eradication of tuberculosis and brucellosis, and (c)      recognised as officially tuberculosis free;(6)(6a)		
	II.2.6.      they have not been vaccinated against brucellosis and they:		
(1)either      ○ [come from herds which are recognised as officially brucellosis free;](6)			
(1)or      ○ [are castrated males of any age;]			
II.2.7.      they are individually marked on at least two places on their hindquarters as to show that they are exclusively intended for immediate slaughter;(7)			
II.2.8.      they are/were(1) dispatched from their holding(s) of origin, without passing through any market:			
(1)either      ○ [directly to Great Britain,]			
(1)or      ○ [to the officially authorised assembly centre described under box reference I.13 situated within the territory described under point II.2.1]			
and, until dispatched to Great Britain:			
(a)      they did not come in contact with other cloven-hoofed animals not complying with the health requirements as described in this certificate, and			
(b)      they were not at any place where, or around which within a 10 km radius, during the previous 30 days there has been a case/outbreak of any of the diseases referred to in point II.2.1;			
II.2.9.      any transport vehicles or containers in which they were loaded were cleaned and disinfected before loading with an officially authorised disinfectant;			
II.2.10.      they were examined by an official veterinarian within 24 hours of loading and showed no clinical sign of disease;			
II.2.11.      they have been loaded for dispatch to Great Britain on _____ (dd/mm/yyyy) (8) in the means of transport described under box reference I.15 above that were cleaned and disinfected before loading with an officially authorised disinfectant and so constructed that faeces, urine, litter or fodder could not flow or fall out of the vehicle or container during transportation.
